

FAQs

What kind of results should I expect?

You can expect some collagen tightening, and many patients have reported:

- Flatter, smoother skin on the tummy, legs, knees, buttocks or arms with less sagging
- Tightening, firming and lifting
- Redefined contours
- Softened wrinkles above the knees
- Reduction of crepey skin
- Smoothed dimples for temporary improvement in the appearance of cellulite

How does it work?

As you age, the collagen in your skin breaks down resulting in wrinkles and sagging skin. Thermage uses patented radiofrequency (RF) technology to effectively heat the deeper layers of your skin, stimulating your existing collagen and promoting new collagen growth.

The Thermage CPT system has enhanced heating for further collagen stimulation. The result is more predictable results and younger looking skin.

What does the Thermage procedure feel like?

Each time the device touches your skin, you'll feel a brief cooling sensation, followed by a deep but brief heating sensation, followed by another cooling sensation. The heating sensation is a sign that the deep layers of your skin are reaching effective temperatures for collagen remodeling. With Thermage CPT technology, you'll also feel a gentle vibration for added patient comfort. Throughout the procedure, your practitioner will ask for feedback on the level of heat sensation to help balance your comfort with maximum results.

How long does the Thermage treatment take?

Thermage treatments average about 90 minutes for the body, depending on the size, location and condition of the area to be treated.

How does Thermage compare with other treatments?

Some people want the dramatic results of surgery. Others want the more subtle, gradual results of a non-invasive treatment with little to no downtime. This is where Thermage succeeds, delivering improved skin appearance, and overall texture. When lotions and potions are not enough and surgery is too much, Thermage is an effective solution.

SKIN FITNESS.

Thermage is like Pilates for the skin. It's the skin fitness treatment that tones and tightens the skin on your body to give you a more youthful appearance.

Thermage uses patented skin tightening technology to give your collagen a workout, stimulating existing collagen and promoting new collagen growth. For fitter, healthier, more beautiful skin, think Thermage.

SKIN TIGHTENING & CONTOURING
FOR THE BODY

BOOST
YOUR BODY
CONFIDENCE

GET COMFORTABLE WITH THE SKIN YOU'RE IN

Thermage® procedures can help smooth, tighten and contour your skin for an overall younger looking appearance in a single treatment without surgery or injections.

Experience the Thermage CPT difference. The latest Thermage procedure offers Comfort Pulse Technology™, clinically proven to significantly improve treatment comfort.

Single treatment. The effects continue to improve for up to six months following a single treatment. Results can last for years depending on your skin condition and natural ageing process.

Little to no downtime. After treatment, you can quickly get back to your normal routine.

Colour blind. Unlike lasers, Thermage procedures work on all skin types and colours.

The year round procedure. After a Thermage procedure, you do not have to avoid the sun as with laser treatments. Schedule your Thermage procedure in Summer or any time that's right for you!

Proven technology. Since 2002, more than one million procedures have been successfully performed on patients of all skin types, body areas and different ages, worldwide, resulting in significant clinical outcomes. The precise radiofrequency (RF) energy allows most patients to experience more immediate results that can last for years, but vary by age, skin condition and skincare regimen.

SMOOTHING AND TIGHTENING

Tummies, knees, legs, arms and hands can be areas that show signs of ageing. Thermage has developed procedures that are designed especially to help smooth and tighten wrinkled, crepey and sagging skin on these body areas.

CONTOURING AND BODY SHAPING

Many women after pregnancy or weight loss find it difficult to get back their shapes and want to tighten sagging skin and unwanted bulges. Thermage helps tighten, firm and shape arms, thighs, buttocks and tummies.
