

FAQs

What kind of results should I expect?

You can expect some collagen tightening, and many patients have reported:

- Smoother, tighter skin with less sagging
- Redefined contours along the jaw and under the chin
- Softening of wrinkles and fine lines around the mouth, eyes and forehead
- Brighter looking eyes
- Reduced under eye sagging
- Smoother skin on the eyelids

How does it work?

As you age, the collagen in your skin breaks down resulting in wrinkles and sagging skin. Thermage uses patented radiofrequency (RF) technology to effectively heat the deeper layers of your skin, stimulating your existing collagen and promoting new collagen growth.

What does the Thermage procedure feel like?

Each time the device touches your skin, you'll feel a brief cooling sensation, followed by a deep but brief heating sensation, followed by another cooling sensation. The heating sensation is a sign that the deep layers of your skin are reaching effective temperatures for collagen remodeling. With Thermage CPT technology, you'll also feel a gentle vibration for added patient comfort. Throughout the procedure, your practitioner will ask for feedback on the level of heat sensation to help balance your comfort with maximum results.

How long does the Thermage treatment take?

Thermage treatments average about 45 minutes for the face, depending on the size, location and condition of the area to be treated.

How does Thermage compare with other treatments?

Some people want the dramatic results of surgery. Others want the more subtle, gradual results of a non-invasive treatment with little to no downtime. This is where Thermage succeeds, delivering improved skin appearance, and overall texture. When lotions and potions are not enough and surgery is too much, Thermage is an effective solution.

SKIN FITNESS.

Thermage is like Pilates for the skin. It's the skin fitness treatment that tones and tightens the skin on your face and around your eyes to give you a more youthful appearance.

Thermage uses patented skin tightening technology to give your collagen a workout, stimulating existing collagen and promoting new collagen growth. For fitter, healthier, more beautiful skin, think Thermage.

SKIN TIGHTENING & CONTOURING
FOR THE FACE & EYES

PUT YOUR
BEST FACE
FORWARD

GET A SMOOTHER, TIGHTER, YOUNGER LOOKING FACE

Thermage® can help smooth and tighten your skin for an overall naturally younger looking appearance without surgery or injections.

Experience the Thermage CPT difference. The latest Thermage procedure offers Comfort Pulse Technology™, clinically proven to significantly improve treatment comfort.

Single treatment. The effects continue to improve for up to six months following a single treatment. Results can last for years depending on your skin condition and natural ageing process.

Little to no downtime. After treatment, you can quickly get back to your normal routine.

Colour blind. Unlike lasers, the Thermage procedure for the face and eyes works on all skin types and colours.

The year round procedure. After the procedure, you do not have to avoid the sun as with laser treatments. Schedule your Thermage procedure in Summer or any time that's right for you!

Younger looking, more lifted eyes. Eyes look brighter. Skin feels tighter and smoother.

No more tired looking eyes. Eyes appear more open and alert. Under eye bags are reduced.

Make-up is applied more easily. The newly smooth skin of your eyelids makes it easier to apply eye shadow and eye liner.

Redefine your relationship with the mirror. Do you find that you no longer look as young as you feel? If the mirror doesn't reflect the way you feel on the inside, now there's a way to turn back the clock. Ask your practitioner if Thermage is right for you.
